

Till the cows come home...

That's how long you can rely on industrial gearing from SEW-EURODRIVE. Old world quality and modern engineering combine to produce units that will keep your equipment running. Our industrial gear units are designed for very demanding applications, like grain elevators and bulk material handling, with torque ratings to over 4,000,000 lb-in. The best part...they are engineered and assembled in South Carolina, USA.

Assembled in the U.S.A.
